agriadorê

Integrated Greenhouse Systems In Emerging Markets

From cultivation to market coordination, connecting greenhouse production to regional and international markets.

Mission

Coordinate growers, controlled-environment infrastructure, logistics, and market pathways around defined commercial opportunities.

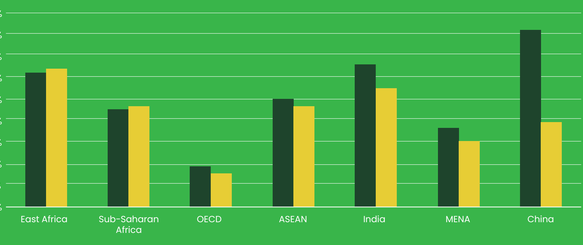

Vision

Advance scalable controlled-environment production and coordinated market pathways across East Africa and international markets.

East Africa is on course to be the fastest-growing economic region globally.

CAGR of Real GDP by Region/Country 2000-2022 / 2022-2040

Source: Euromonitor International from national statistics /UN/OECD

Over the forecast period (2022-2040), East Africa is anticipated to deliver a GDP CAGR of 6.1% in real terms, outstripping other rapidly growing emerging and developing markets in Southeast Asia, Latin America, and Africa

agriadorê US OPERATIONS

1 Corporate & Strategic Platform

- Strategic partnerships and system-level coordination
- Commercial opportunity structuring
- Supply-chain coordination and planning
- Market pathway development
- Partner and stakeholder alignment

2 Operational Coordination

- Production planning and grower coordination
- Greenhouse and infrastructure alignment
- Logistics and supply-movement coordination
- Operational execution oversight

3 Global Market Access

- Aligning production pathways with market demand
- Supply readiness and aggregationalignment
- Buyer and market engagement
- Commercial pathway coordination

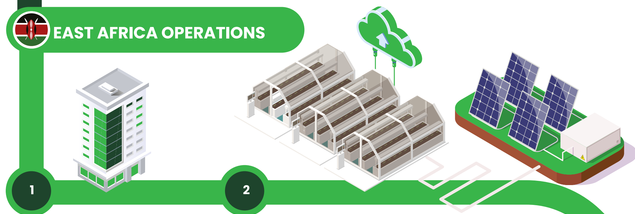

4 Inbound Logistics & Delivery Coordination

- Shipment planning and coordination
- Regional and cross-border logistics coordination
- Customs and regulatory pathway coordination
- Carrier and delivery-partner alignment

5 Cross-Border Payment Coordination

- Approved commercial settlement methods
- Domestic and international payment coordination
- Transaction-specific settlement instructions
- Regional settlement options as appropriate

EAST AFRICA OPERATIONS

1 East Africa Operations

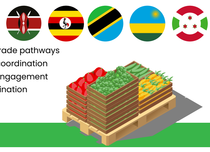

- Regional Operations & Coordination

2 Integrated Cultivation Systems

- Controlled- environment production
- Greenhouse infrastructure
- Climate, irrigation, and nutrient management
- Yield optimization systems
- IoT-enabled monitoring and data systems for high-value crops

Sustainable Power Integration (Solar)

- Solar-supported energy systems for greenhouse operations
- Reduced reliance on grid power and diesel generation
- Improved operational stability in remote and off-grid environments

3 Regional Trade & Market Access

- East African Community (EAC) trade pathways
- Cross-border market pathway coordination
- Regional buyer and distributor engagement
- Relationship-driven trade coordination

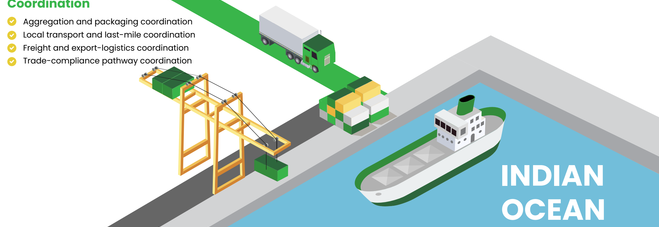

4 Operational Intelligence

- Yield and production performance tracking
- Market demand and pathway insights
- Stakeholder reporting and operational visibility

5 Logistics & Export Coordination

- Aggregation and packaging coordination
- Local transport and last-mile coordination
- Freight and export-logistics coordination
- Trade-compliance pathway coordination

Strategic Engagement & Revenue Model

Agriadore coordinates agricultural market-entry opportunities, production-readiness assessments, and commercial pathways through defined client engagements. Revenue is generated through agreed coordination fees for scoped services, specialist engagement management, and operational-readiness support.
